PROFILE

Full-stack web developer in career transition, specialized in .NET (C#, Entity Framework Core, SQL) with a solid foundation in front-end development (JavaScript, HTML, CSS, SASS). Organized, motivated and committed to continuous learning, I am looking to join an Agile team to contribute to the development of modern web applications and strengthen my skills in cloud technologies and APIs.

SKILLS

Technical skills

Backend :

C#, .NET, ASP.NET Core, Entity Framework Core

Frontend :

JavaScript, HTML, CSS, SASS, Bootstrap

Databases :

SQL Server, PostgreSQL (basic knowledge)

Tools & DevOps :

Git / GitHub, GitHub Actions, CI/CD, Visual Studio, NuGet, PowerShell

Methods & design :

UML, Agile (Scrum), Figma

Additional knowledge:

Authentication (Identity), REST APIs (basic knowledge), AJAX, web deployment (Azure Web App, Render, Netlify), Docker (basic understanding – built and deployed an app using a Dockerfile)

Project & Team Skills

- Project structuring and requirements analysis
- Writing clear and actionable user stories
- Kanban task organization (Trello)
- Basic Agile principles (Scrum theory)
- Clear and concise technical documentation
- Prioritization & organization
- Autonomy and proactive communication

Soft skills

Organization – Attention to detail – Autonomy - Adaptability - Teamwork – Service-oriented mindset

Languages

French: mother tongue - **English: B2** - Italian: B1

MAIN PROJECTS

Online Ticketing – Paris 2024 Olympic Games

ASP.NET Core MVC – EF Core – Identity

- Developed a complete CRUD system to manage **ticket offers** (Solo, Duo, Family, etc.)
- SQL database using **Entity Framework Core**
- Authentication and role management with **Identity**
- Business logic: reservations, ticket storage, payment simulation
- Razor views and MVC architecture

Technologies: ASP.NET Core, EF Core, SQL Server, Identity, MVC, Docker (deployment via Dockerfile)

Professional Website - Vitamouv.fr

Full-stack project – ASP.NET Core + AJAX + SEO

- Full website design: architecture, structure, UX, responsive layout
- **Dynamic contact form** using **AJAX**
- Email sending implemented with **SendGrid**, then migrated to **Brevo** (secure API),
- SEO Optimization: tags, performance, structure
- Production deployment

Technologies: ASP.NET Core, C#, AJAX, HTML/CSS/SASS, JavaScript, SEO, web deployment

Personal Portfolio – Full Design & Development

Front-end project – HTML / CSS / JavaScript

- Modern and responsive portfolio to showcase projects
- Custom design, light animations, clear structure and navigation
- Mobile optimization using native CSS
- Contact Form via Netlify Forms
- Simple multilingual system
- Dark mode integration

Technologies: HTML, CSS, JavaScript, responsive design

Interactive Advent Calendar

Front-end project – HTML / SASS / JavaScript

- Responsive interface with CSS animations
- User interaction management
- Dynamic opening of calendar windows via JavaScript

Technologies: JavaScript, HTML, SASS, CSS animations, LocalStorage
